

Step-by-Step Hairstyles Basic Pull Back

Styling Hints:

Best worn: This is the basic style, play with holding back different amounts of hair or “butterfly” the hairzing to tighten grip.

NOTE: Please read the “Four Quick Steps to Getting Started” section BEFORE you begin to understand how to hold the comb, etc.

Step 1

Pull back section of hair to be held in Hairzing with your Second (left) hand.

Position Comb #1 properly with First (right) hand and begin to slide into hair.

Step 2

Reach through Comb #1 with fingers of First (right) hand and grasp hair being pulled back into hairzing.

Grab Comb #2 with Second (Left) hand and S-T-R-E-T-C-H Comb #2 towards second ear.

Flip teeth down toward ear.

Step 3

TUCK and slide Comb #2 back underneath hair so teeth face the teeth of Comb #1.

Adjust for Comfort. If hairzing feels too LOOSE—combs need to be stretched further apart to tighten. If hairzing feels too TIGHT—gently push combs together until the teeth nearly touch.

Finished!

Use the Basic Pull Back to hold ANY section of hair—from bangs to pulling back the majority of your hair.

Position so most of the comb is on the widest curve of your head, and not too low on the nape of your neck.
