

## Step-by-Step Hairstyles Butterfly Basic Pullback

### Advantage:

The “Butterfly” gives an extra pretty look, but also tightens the pull between the combs, so it can be used whenever you want the most snug hold.

*NOTE: Please read the “Four Quick Steps to Getting Started” section BEFORE you begin to understand how to hold the comb, etc.*

### Step 1

Gather hair with your left hand. Hold Comb #1 with the curve facing DOWN so it hugs the curve of your head. Your thumb rests underneath and your other fingers come UP and THROUGH the stretchbands.

SLIDE comb #1 into hair high on the curve of your head for maximum stability. Use the fingertips of your left hand to gently press down and hold Comb #1 in place.

### Step 2

Reach through stretchbands and transfer hair from left to right hand.

### Step 3

Grasp Comb #2 with left hand, and STRETCH it straight out, parallel to left ear.

Twist COMPLETELY around 1 time (360 degrees) for a tight hold. For an even tighter hold, twist the comb COMPLETELY around 2 full times...

### Step 4

...before flipping it under and sliding back into the hair. Make sure the comb is in the exact same starting position (with the “U” Shape of the comb curve facing upward to the ceiling) before you flip it under and slide it back into hair.

### Finished!

Adjust for comfort. Sliding the combs towards each other loosens the hold, stretching them farther apart will tighten the grip.
