

Step-by-Step Hair Styles Double Coil Bun

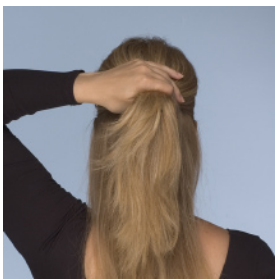

Getting Started:

Read Instructions for Single Coil Bun and Repeat Steps 1-5

NOTE: Please read the "Four Quick Steps to Getting Started" section BEFORE you begin to understand how to hold the comb, etc.

Step 1

Since you will be making two buns for this style, section off a smaller amount for the first coil, and place it high on the head.

Step 2

To create the second coil bun, section hair into a ponytail below the first you already created.

Twist and wrap the ponytail into a second coil.

Styling Tip:

SHORT HAIR: Nikki with two Medium size HairZings over her Double Coil bun. Her hair is short and fine so using two Large size HairZings would have overwhelmed her. The Medium size is much more attractive in this case.

Styling Tip:

LONG SILKY STRAIGHT HAIR: Alexis with two Medium size HairZings over her Double Coil bun. Alexis's hair slides easily out of most accessories.

To prevent that and give her long holding power, she chose two Medium size HairZings. The combs are stretched far enough apart to hold very securely, and she wrapped her hair tightly from the base to the ends without letting the ponytail loosen. She also tucked her ends deep into and underneath the coil bun for extra strength.
