

Step-by-Step Hairstyles Half Up ~ Half Down

NOTE: Please read the "Four Quick Steps to Getting Started" section BEFORE you begin to understand how to hold the comb, etc.

Step 1

Separate a section of hair (above ear) and gather into a ponytail.
Hold with one hand (generally the left hand if you are right-handed).
Refer to "FOUR QUICK STEPS TO GETTING STARTED" section for images of hand placement.

Step 2

SLIDE first comb into the hair.
USE YOUR FINGERS to create a wide opening in the center section of the stretch bands...this will create a space for your ponytail to glide through.

Step 3A

SWITCH HANDS: "HOOK" the ponytail with the extended Middle and/or Index fingers of your right hand and PULL it through the stretch bands to right side.
Other hand (left) grasps comb and pulls it smoothly towards opposite ear.

Step 3B

FLIP second comb and SLIDE / HIDE it back into your hair. The teeth of both combs will face each other underneath your hair. The farther the teeth are stretched apart, the tighter the hold.
Push the combs closer together if you want a looser grip.

Finished!

Variations:

You can add a Butterfly Twist for a different look and a tighter hold.
