

Step-by-Step Hairstyles Sport Ponytail

Advantage:

Offers extra snug hold by “wrapping” the stretchbands around your ponytail.

NOTE: Please read the “Four Quick Steps to Getting Started” section BEFORE you begin to understand how to hold the comb, etc.

Step 1

Gather hair into ponytail anywhere on the head. Hold in left hand.
USE YOUR FINGERS to create a large opening in the center section of the stretch bands for your ponytail to easily glide through.

Step 2

To begin--WITHOUT placing combs in hair, PULL the ponytail through the stretchbands. It is easiest to do this if both combs face DOWN, so they cup the top of your head

Step 3

With Right hand, grasp Comb #1 and pull it firmly straight out over first (right) ear.
TWIST it HALF WAY around (180 degrees) –Tuck it down—and Slide it into hair on right side near right ear.

Step 4

With Left hand, repeat Step #3. Grasp Comb #2 and pull it firmly straight out over second (left) ear.
TWIST it HALF WAY around (180 degrees) –Tuck it down—and Slide it into hair on Left side near left ear.

Styling Tip:

When done correctly, the Curve of the Combs will slide snugly into your hair. If you have twisted the comb too much or not enough—the comb will be at the wrong angle. In this case you will NOT be able to slide the comb into your hair since the angle will curve upward and “rock” on your head.

Finished!
